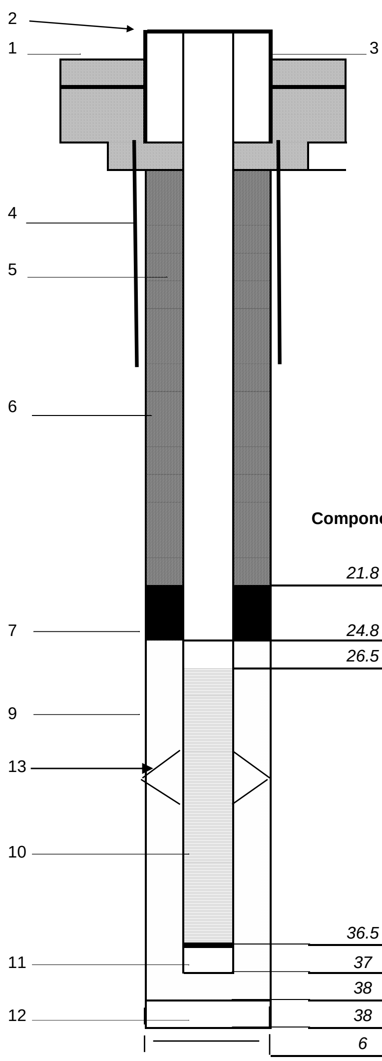
NORTHING: *302752.342*	EASTING: *2276498.189*	DRILLING CONTRACTOR:	*Cascade*
START DATE: *04-15-2020*	END DATE: *04-19-2020*	DRILLING METHOD:	*Rotosonic*
BOREHOLE DIAMETER: *6* inches		DRILLING EQUIPMENT:	*6 inch OD / 4 inch ID rods*
TOTAL BOREHOLE DEPTH: *35* feet bgs		LOGGED BY:	*Ian Bingeman (PHL)*



Component Depths BGS

21.8	Top of transition seal (feet bgs)
24.8	Top of filter pack (feet bgs)
26.5	Top of screen (feet bgs)
36.5	Bottom of screen (feet bgs)
37	Bottom of sump (feet bgs)
38	Bottom of filter pack (feet bgs)
38	Bottom of borehole (feet bgs)
6	Borehole Diameter (inches)

NOTE: DRAWING NOT TO SCALE

1- Ground elevation at well	*680.060*	feet msl
2- Top of casing elevation	*682.630*	feet msl
3- Surface completion type	*Steel protective casing*	
a) Protective casing dimensions	*4 feet long / 4 inches wide*	
b) Concrete pad dimensions	*24 x 24*	inches
c) Bollards	*3*	
4- Conductor casing type	*None*	
a) Diameter	*-*	inches
b) Length	*-*	feet
5- Well casing type	*Schedule 40 PVC*	
a) Diameter	*2*	inches
b) Length	*29*	feet (including stick-up)
6- Sanitary seal type	*Bentonite quick grout*	
a) Method of placement	*Gravity fed*	
b) Volume used	*15*	gallons
c) Calculated volume	*4.1* feet^3 -	gallons
7- Transition seal type	*Hydrated medium bentonite chips*	
a) Quantity used	*0.75*	50 lb bags
b) Calculated quantity	*0.6* feet^3 -	50 lb bags
8- Transition filter pack type	*None*	
a) Quantity used	*-*	50 lb bags
b) Calculated quantity	*-* feet^3 -	50 lb bags
9- Filter pack type	*#15 sand - red flint*	
a) Quantity used	*4.5*	50 lb bags
b) Calculated quantity	*2.25* feet^3 -	50 lb bags
10- Screen type	*Schedule 40 PVC*	
a) Diameter	*2*	inches
b) Length	*10*	feet
c) Slot size	*0.010*	inches
11- Sump / end cap type	*Schedule 40 PVC end cap*	
a) Diameter	*2*	inches
b) Length	*0.5*	feet
12- Backfill type	*None*	
a) Quantity used	*-*	
b) Calculated quantity	*-* feet^3	
13- Centralizer type	*-*	
a) Depths	*26*	feet bgs

Well Development

Start Date/Time:	*04-18-2020 / 10:30*	
End Date/Time:	*04-18-2020 / 11:15*	
Measured Depth to Water	*33.06*	feet btoc
Development Method:	*Submersible pump*	
Duration:	*0.75*	hours
Purge volume:	*2.5*	gallons
Volume of water injected:	*0*	gallons
Calculated casing volume:	*1.0*	gallons

Comments: *bgs = Below ground surface. btoc=Below top of casing. lb = Pound. msl = Mean sea level. NA = Not applicable. PVC = Polyvinyl chloride*

Purged dry during well development on 04-18-2020 (2.5 gallons purged)

Remarks: Pump Intake Depth: 27 Ft

Control Box Setting (Hz):

Sampling: (Sample at 100-250 ml/min) 125 mL/min

Surface of water column looks foamy. Reddish brown condensation above water column.

PID: BZ=0.0 ppm Headspace = 0.0 ppm

SAMPLING

Depth to Water Before Sampling: 3.98
Sample Methodology: Peristaltic
Sample Name: SA-99-1
QC Sample: —
Sample Date/Time: 3/21/19 1305
Sampler / Signature: [signature]
Filtered Metals Collected: Y / N Filter Size: —
Sample Observations: ~~Clear~~ amber
Parameters:

Notes:

MCL = Maximum Containment Level

PAL = Project Action Level

RSL = Regional Screening Level

TCR = Target Cancer Risk

THQ = Target Hazard Quotient

[1] The Final Site Characterization PAL is the MCL. If no MCL is available, the greater of the HAL and the tap water RSL is selected.

Notes:

BTAG = Biological Technical Assistance Group

IAWQC = Iowa Ambient Water Quality Criteria

PAL = Project Action Level

RSL = Regional Screening Level

The selected ecological screening level is the first available screening level according to the following hierarchy: IAWQC Chronic, USEPA National Recommended Water Quality Criteria - Aquatic Life, USEPA Region 4, USEPA Region 5, USEPA Region 3 BTAG.

The selected human health screening level is the lowest screening level of the human health criteria listed in the table.

*Selected ecological screening level differs for each watershed as indicated on site-specific report tables.

(1) Fish consumption is not allowed over most of the IAAAP; therefore, this value does not apply to most IAAAP sites.

(2) The Final Site Characterization PAL is the lower of the selected ecological screening level and selected human health screening level.

Notes:

PAL = Project Action Level

RSL = Regional Screening Level

The selected ecological screening level is the first available screening level according to the following hierarchy: USEPA Region 4 Ecological Screening Level, USEPA Region 5 Ecological Screening Level.

The selected human health screening level is the USEPA Residential Soil RSL.

(1) The Final Site Characterization PAL is the lower of the selected ecological screening level and selected human health screening level.

Notes:

BTAG = Biological Technical Assistance Group

PAL = Project Action Level

RSL = Regional Screening Level

The selected ecological screening level is the first available screening level according to the following hierarchy: USEPA Region 4 Ecological Screening Level, USEPA Region 5 Ecological Screening Level, USEPA Region 3 BTAG.

The selected human health screening level is the USEPA Sediment RSL for a recreational scenario.

[1] The Final Site Characterization PAL is the lower of the selected ecological screening level and selected human health screening level.
